- FOR IMMEDIATE RELEASE -

Lean Compliance and Elemental Compliance Announce 2-Day Pipeline SMS Startup Workshop

Toronto - Feb 26, 2020 Lean Compliance and Elemental Compliance announce their offering of a *2-Day Pipeline SMS Startup Workshop* for companies who intend to implement API RP 1173 and see safety improvements this year.

According to Raimund Laqua, Founder of Lean Compliance, "this workshop is different from what we have seen in the marketplace. It is hands-on and designed for participants to create their own implementation roadmap focused on improving capabilities essential for achieving better safety outcomes."

Nicole Tebow, Principle of Elemental Compliance says, "it is important to recognize that this is not a training seminar or for organizations who are only interested in the bare minimum. We designed this workshop for companies who see the value of a safety management system and want the benefits that come from it."

Companies interested in the *2-Day Pipeline SMS Startup Workshop* should contact Lean Compliance or Elemental Compliance at their respective websites listed below.

Lean Compliance is focused on helping organizations in highly-regulated, high-risk industries meet all their obligations, reduce risk, and increase stakeholder trust. Lean Compliance provides member-based programs and services engineered to continually improve program effectiveness over time. Lean Compliance has over 30-years experience working in oil & gas, pipeline, energy, pharma, medical device, government, and high-tech industries.
